

MarQ 6—

The **MarQ 6** is sized appropriately to lift and deploy small tenders, scooters and single person watercraft.

When not in use, the davit stows so low on deck that it becomes virtually hidden beside the tender. Power runs though the standpipe so you'll only need to switch on the circuit, attach the hand control and release the hook before use.

This is the smallest davit we build and is the price/performance leader in its product range. The **MarQ 6** is backed by the same design expertise, high production quality, and customer service excellence as our larger davits and cranes. To understand why we are the acknowledged industry leader in tender-handling and boarding equipment, just ask fellow boaters about their experience with MarQuipt versus our competitors.

- 600 LBS (272 KG) lift capacity.
- Stainless steel gas-assist boom lifting system for easy operation.
- Five boom positions provide enhanced versatility in tender and davit placement.
- 360° manual rotation on non-corrosive bearing.
- Internal drum winch eliminates boxes protruding from either sides of the boom.

- Mounts on our 4-1/2" (11 CM) diameter standpipe.
- Custom base mounts eliminate the standpipe for transom applications.
- Painted to match your yacht.
- Power: 12 or 24 VDC.
- Manual hand crank for emergency retrieval if power is lost.
- Weight: 135 LBS (61 KG) without the standpipe.

Boom Operating Angles 30-60°—

Boom Angle: (Five Positions)	Reach: (Hook to Center of Rotation)	Lift Height: (Hook to Deck)
30° Minimum	80" (203 CM)	49" (124 CM)
39°	73" (185 CM)	60" (152 CM)
47°	63" (160 CM)	70" (178 CM)
55°	54" (137 CM)	77" (196 CM)
60° Maximum	45" (114 CM)	82" (208 CM)
