

MarQ 8 Telescopic—

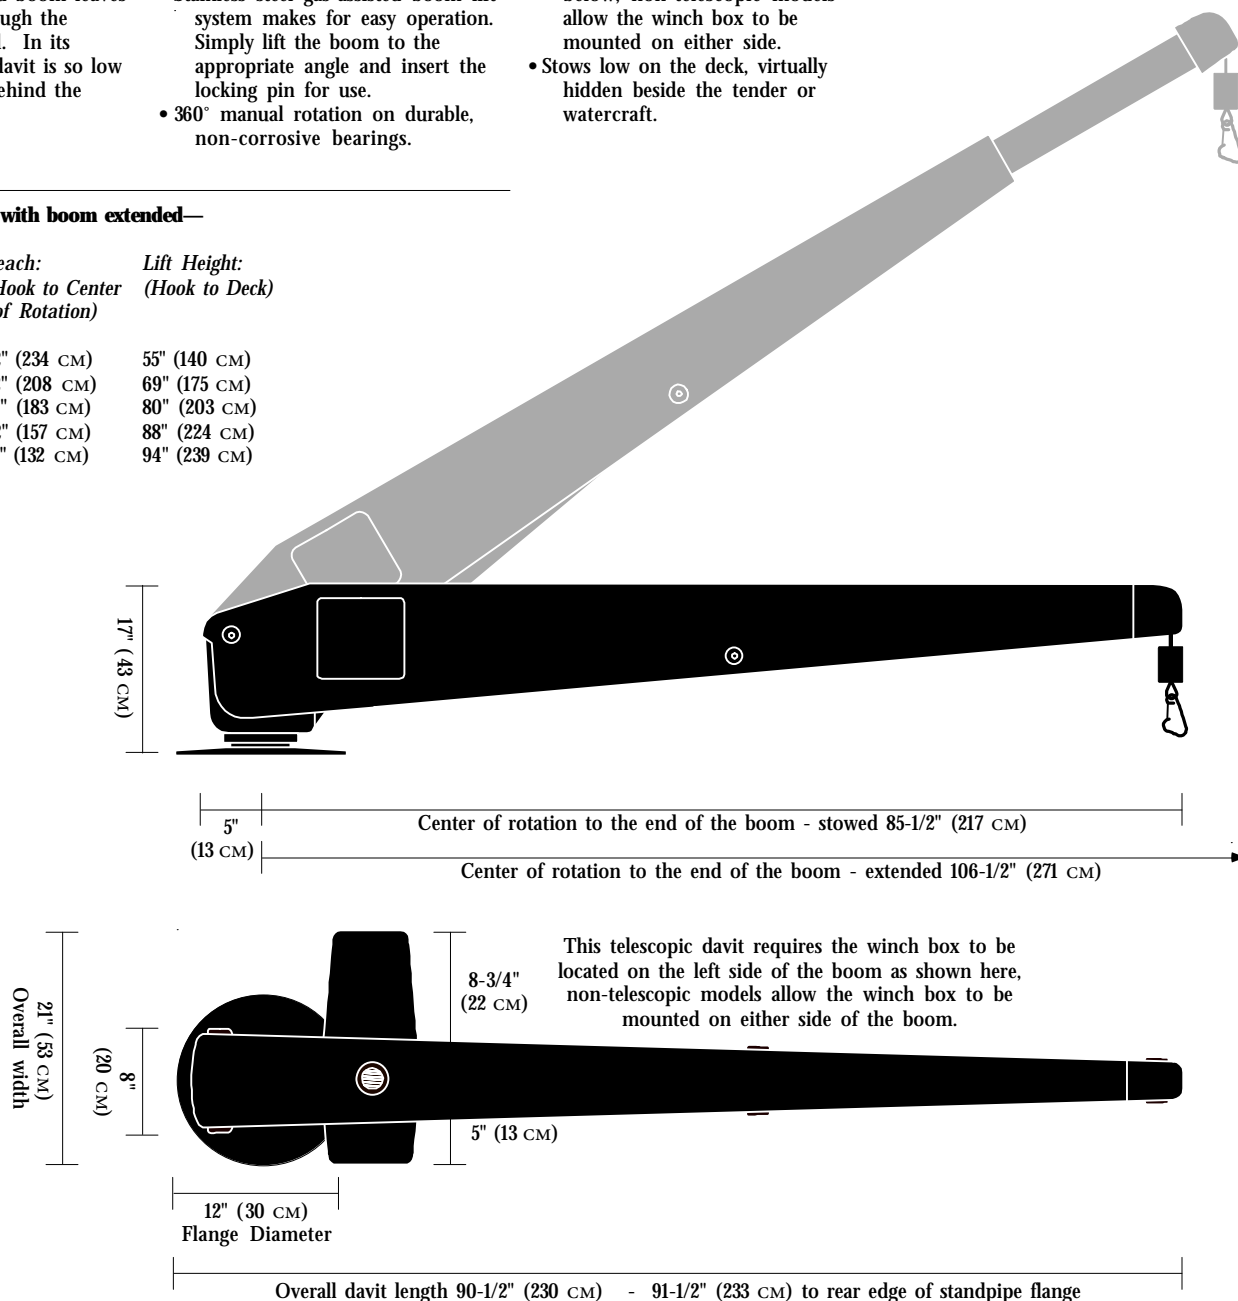

Designed to stow in particularly tight quarters, yet extending a full length boom when in use, the **MarQ 8 Telescopic** is often the ideal solution for carrying a tender or water craft on the swim platform. With the davit stowed across the transom, the retracted boom leaves the gate opening through the transom unobstructed. In its stowed position, the davit is so low it is usually hidden behind the tender.

- 800 LBS (363 KG) lift capacity.
- Manual telescoping boom.
- Five evenly spaced boom angles provide 10" increments in reach between each position for enhanced versatility in tender and davit placement on deck.
- Stainless steel gas-assisted boom lift system makes for easy operation. Simply lift the boom to the appropriate angle and insert the locking pin for use.
- 360° manual rotation on durable, non-corrosive bearings.
- Mounts on our standard 4-1/2" (11 CM) diameter standpipe or via custom base mounts for transom applications.
- This telescopic davit requires the winch box to be located on the left side of the boom as shown below, non-telescopic models allow the winch box to be mounted on either side.
- Stows low on the deck, virtually hidden beside the tender or watercraft.

- Painted to match your yacht.
- Power options:
12 VDC - 160 AMP, 24 VDC - 80 AMP.
- Weight: 145 LBS (66 KG) without the standpipe.

Lift height and reach with boom extended—

Boom Angle: (Five Positions)	Reach: (Hook to Center of Rotation)	Lift Height: (Hook to Deck)
30° Minimum	92" (234 CM)	55" (140 CM)
39°	82" (208 CM)	69" (175 CM)
47°	72" (183 CM)	80" (203 CM)
54°	62" (157 CM)	88" (224 CM)
60° Maximum	52" (132 CM)	94" (239 CM)
