

MarQ 8—

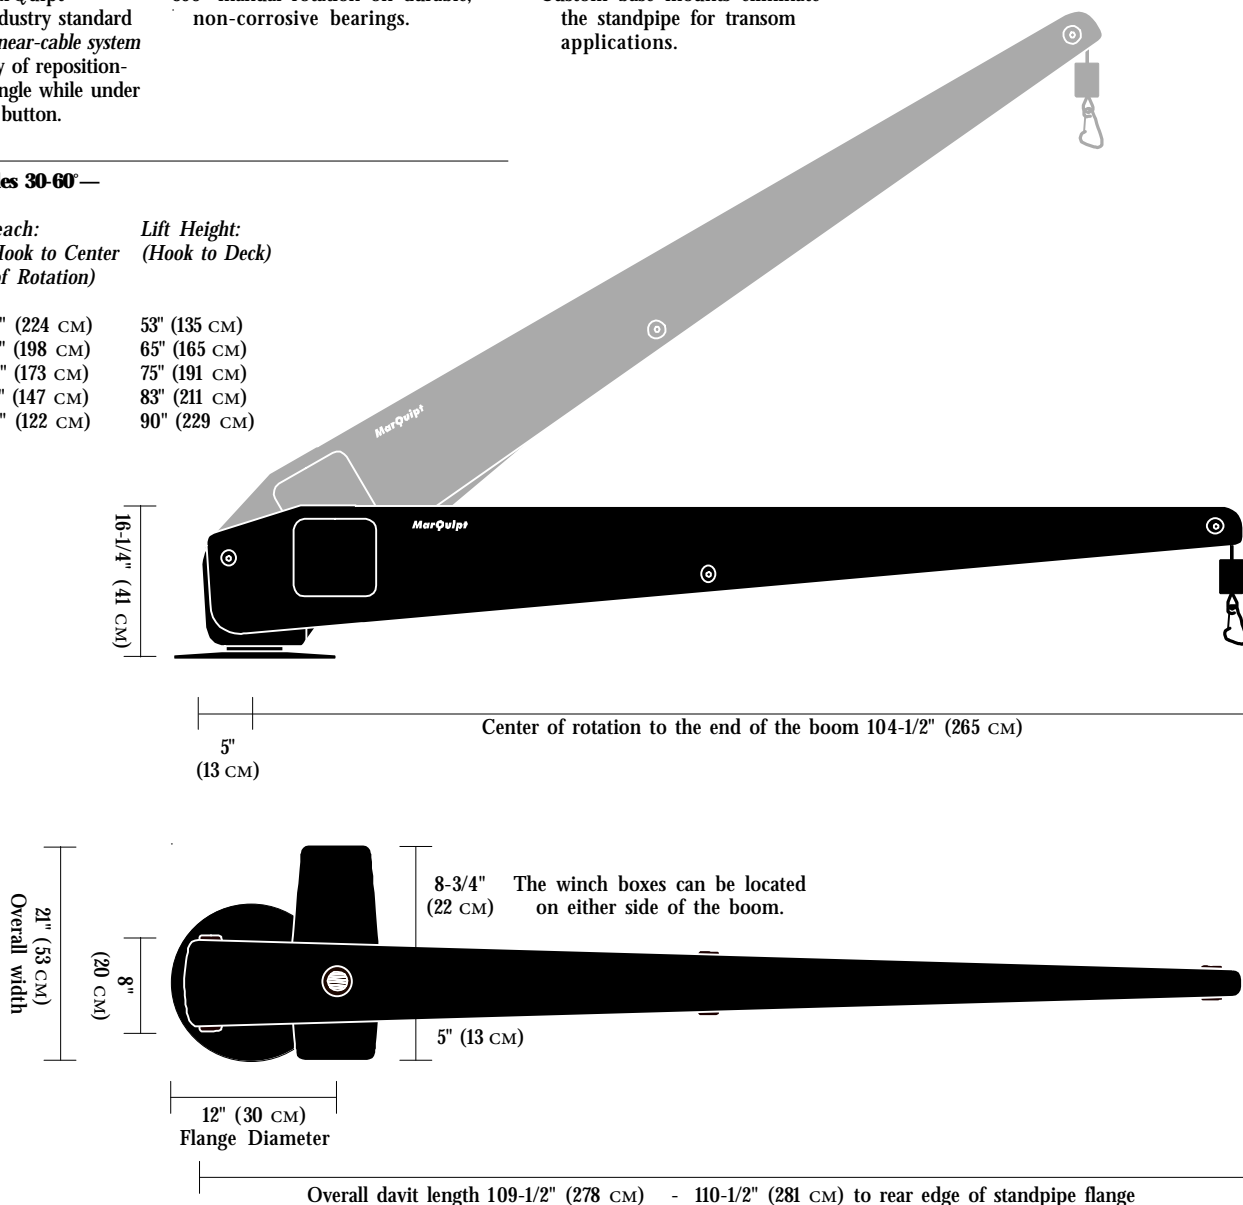

As our highest capacity davit with a traditional electric drum winch, the **MarQ 8** is the leader in quality, reliability and value. It remains the uncontested choice when DC power or an unusually long cable length to reach the water is required. The **MarQ 8 Tender-Lift** version shares the same weight capacity and boom length, but is powered by a small 120 or 230VAC hydraulic unit. Hydraulic power enables the MarQuipt developed and now industry standard *Tender-Lift winchless linear-cable system* as well as the capability of repositioning the boom to any angle while under load, at the touch of a button.

- 800 LBS (363 KG) lift capacity.
- Five evenly spaced boom angles provide 10" increments in reach between each position for enhanced versatility in tender and davit placement on deck.
- Stainless steel gas-assisted boom lift system makes for easy operation. Simply lift the boom to the appropriate angle and insert the locking pin for use.
- 360° manual rotation on durable, non-corrosive bearings.
- Stows low on the deck, virtually hidden beside the tender or watercraft.
- We can position the winch on either side of the boom to accommodate your stowage requirements.
- Detachable hand control provides simple cable in/out control.
- Mounts on our standard 4-1/2" (11 CM) diameter standpipe. Custom base mounts eliminate the standpipe for transom applications.

- Painted to match the yacht's finish.
- Power options:
12 VDC - 160 AMP, 24 VDC - 80 AMP
power cabling runs through pipe.
- Weight: 145 LBS (66 KG) without the standpipe.

Boom Operating Angles 30-60°—

Boom Angle: (Five Positions)	Reach: (Hook to Center of Rotation)	Lift Height: (Hook to Deck)
30° Minimum	88" (224 CM)	53" (135 CM)
39°	78" (198 CM)	65" (165 CM)
47°	68" (173 CM)	75" (191 CM)
54°	58" (147 CM)	83" (211 CM)
60° Maximum	48" (122 CM)	90" (229 CM)
