

Custom Overhead Cranes—

Traditional cranes and tender deployment systems do not begin to approach the functional elegance of an integrated MarQuipt *Custom Overhead Crane System*.

Give us a call to discuss your project. We will be happy to show you previous overhead crane systems designed and built for other customers and share with you some ideas about what may be most appropriate for your application.

- Overhead cranes extend off either side or off the stern of the yacht.
- Single or twin telescopic booms retract into the overhead or into an aft tender locker.
- Lifting capacities to suit your requirements.
- *Tender-lift* hydraulic system provides smooth, nearly silent cable operation.
- Hydraulic shipside door systems available for a fully integrated tender deployment and stowage solution.
- Completely waterproof, low voltage, fully proportional, hand-held remote control system.
- Optional flush flood lights.
- All marine grade aluminum and passivated stainless steel construction with composite isolation bearings for superior corrosion resistance.
- Painted to match the yacht.
